

Product Announcement

Company: Cla-Val
Address: 1701 Placentia Avenue
City/State/Zip: Costa Mesa, CA 92627
Telephone: 800.942.6326
Fax: 949.574.5703
Email: pmexpert@cla-val.com
Website: www.cla-val.com
Contact: Phyllis Dretzka @ 949.722.4866

March 12, 2008, Newport Beach, CA -- Cla-Val (www.cla-val.com) recently released an interactive water savings calculator for water distribution system managers. The online calculator is designed to illustrate the volume of water and associated costs that can be saved by incorporating Cla-Val 98 Series Advanced Hydraulic Pressure Management Valves into their pipeline networks.

The valves themselves save water, decrease the frequency of pipe breaks and minimize background leakage by lowering pressure during periods of low demand rather than leaving pipelines over-pressurized and subject to unnecessary stress. The calculator provides an estimate of the water and cost savings that can be achieved through pressure management using system data that is entered into the calculator by the user. Data includes pipe size, estimated daily water usage, standard system pressure, estimated system leakage and other system parameters. The data is then factored into a formula that yields calculated annual water and financial savings that can be derived from using Cla-Val's 98 Series valves.

The Cla-Val Water Savings Calculator is available at:
