

Your vault... powered by Cla-Val.

harness the energy of water
to generate power

- Cla-Val's X143HP Power Generator uses the pressure in your system to produce 12 or 24 VDC power
- Enables you to add 24-Hour power for pressure management and metering capabilities
- The power generated by the X143HP can be used for SCADA communication equipment and to run valve site devices such as vault lighting and sump pumps...
- No down time due to cloudy days
- No need to tie into the power grid

the power to be efficient
