

Cla-Val Air Release and Vacuum Breaker Valves

from the name you trust most for top quality waterworks products

Charles R. Underwood, Inc.

serving the people of North and South Carolina since 1965

34 Series Air Release Valve

- Automatically vents entrained air that collects at high points in the pipeline
- Helps to prevent pipe ruptures caused by air pockets
- Engineered for drip-tight seal at low pressures
- Stainless Steel floats guaranteed
- Easily serviced without removal from pipeline
- Working pressures to 800 PSI

36 Series Combination Air Release and Vacuum Breaker Valve

- Automatically exhausts and admits air during filling to prevent a vacuum condition from occurring
- Fully ported - No restrictions
- Engineered for drip-tight seal at low pressures
- Stainless Steel T316 floats guaranteed
- Easily serviced without removal from pipeline
