# Seawater Service Pressure Reducing Valve

90G-42  
Globe Pattern

- Globe or Angle Pattern
- Proven Reliable Design
- Available in Cast Bronze, Iron and Steel
- Accurate Pressure Control
- In Line Service

Cla-Val 90G-42 (globe) and 90A-42 (angle) Pressure Reducing Valves are indispensable in any fire protection system. Our diaphragm actuated design is proven highly reliable and easy to maintain. We offer both a globe or angle pattern with a full range of adjustments. These valves are available in cast bronze, iron or steel and all special alloy. Epoxy coating for all system valves are supplied with internal and external epoxy coating of the main valve wetted surfaces, for ductile iron and cast steel only.

If UL Listed is required for Model 90-42 Seawater Service use Model 90-21KX when ordering. UL Listed sizes limited to 1 1/2" - 8" sizes.

## Function

Cla-Val Model 90G-42 (globe) and 90A-42 (angle) Seawater Service Pressure Reducing Valves automatically reduce a higher inlet pressure to a steady lower outlet pressure regardless of changing flow rate and/or varying inlet pressure. The valves pilot control system is very sensitive to slight downstream pressure fluctuations, and will automatically open or close to maintain the desired pressure setting. The downstream pressure can be set over a wide range by turning the adjustment screw on the CRD pilot control. The adjustment screw is protected by a screw-on cover, which can be sealed to discourage tampering.

Cla-Val Control Valves operate with maximum efficiency when mounted in horizontal piping with the main valve cover UP, however, other positions are acceptable. Due to component size and weight of 8 inch and larger valves, installation with cover UP is advisable. We recommend isolation valves be installed on inlet and outlet for maintenance. Adequate space above and around the valve for service personnel should be considered essential. A regular maintenance program should be established based on the specific application data. However, we recommend a thorough inspection be done at least once a year. Consult factory for specific recommendations.
