

End of the line water quality

Cla-Val Flush Valves help achieve optimum water quality even for customers at the “end of the line”

- Ideal for automating distribution system flushing applications, especially in low usage distribution lines
- Helps to maintain water quality within disinfection and health standard limits
- Self-contained with rugged waterproof components
- Because it is battery powered, it is ideal for applications in isolated or hard-to-access locations
- No need to deploy personnel to distant valve sites

- Self-contained, battery-powered
- Easily programmed
- Reliable drip-tight shut-off
- Easy installation and maintenance

The Cla-Val Model 136-AU Battery-Operated Programmable Control Valve provides on-off control of water flow according to a program sequence without any outside power or remote control device required.
