

# Keep It Clean!

## Pipeline Strainer flushing has never been easier

The flexible design of the Cla-Val Model X43HL H-Style Strainer includes a body port that allows for installation of a manual or programmable flush valve to clear small amounts of debris from the strainer without removing the cover. For more thorough cleaning, the top cover can easily be removed without taking strainer out of the pipeline.

Using the programmable Cla-Val Model 139-01 Timer Controlled Valve for flushing the X43HL Strainer helps ensure optimum performance at minimal cost and effort as well as the following additional benefits:

- Precise on-off control
- Can be set to open and close up to four times daily
- 3+ year battery life
- Ideally suited to locations with no available electricity

## Cla-Val Model X43HL H-Style Strainer Product Advantages

- Protect valves, pumps, compressors, condensers, flow meters, steam traps and other equipment from damage caused by debris in the pipeline
- Large "H-Style" flow area is designed to ensure low pressure drop
- Inline design requires less clearance above and below than conventional Wye strainers
- Standard Ductile Iron Fusion Bonded Epoxy Coated body with a 316 SS Strainer
- Also available in Nickel Aluminum Bronze Construction with a Titanium Strainer for harsh or seawater environments
- Ideal for high pressure applications as well as offshore and refinery installations
- Can be provided attached to a new Cla-Val Automatic Control Valve or retrofitted to an existing, installed valve

# Innovation...Experience...Know-How

As a leading manufacturer of automatic control valves, Cla-Val has served the following markets since 1936:

- Waterworks
- Fire Protection
- Aviation Ground Fueling
- Marine and Shipboard Service

We offer many advantages to our customers worldwide, including the following:

- In-house Engineering Department
- Onsite investment and sand casting foundries able to pour more than 50 different metals and alloys
- 22-acre manufacturing facility in Costa Mesa, CA
- Production facilities in Perris, CA; Ontario, Canada; Switzerland; the United Kingdom; and France
- Extensive technical training capabilities
