

# Offshore Platform System Protection

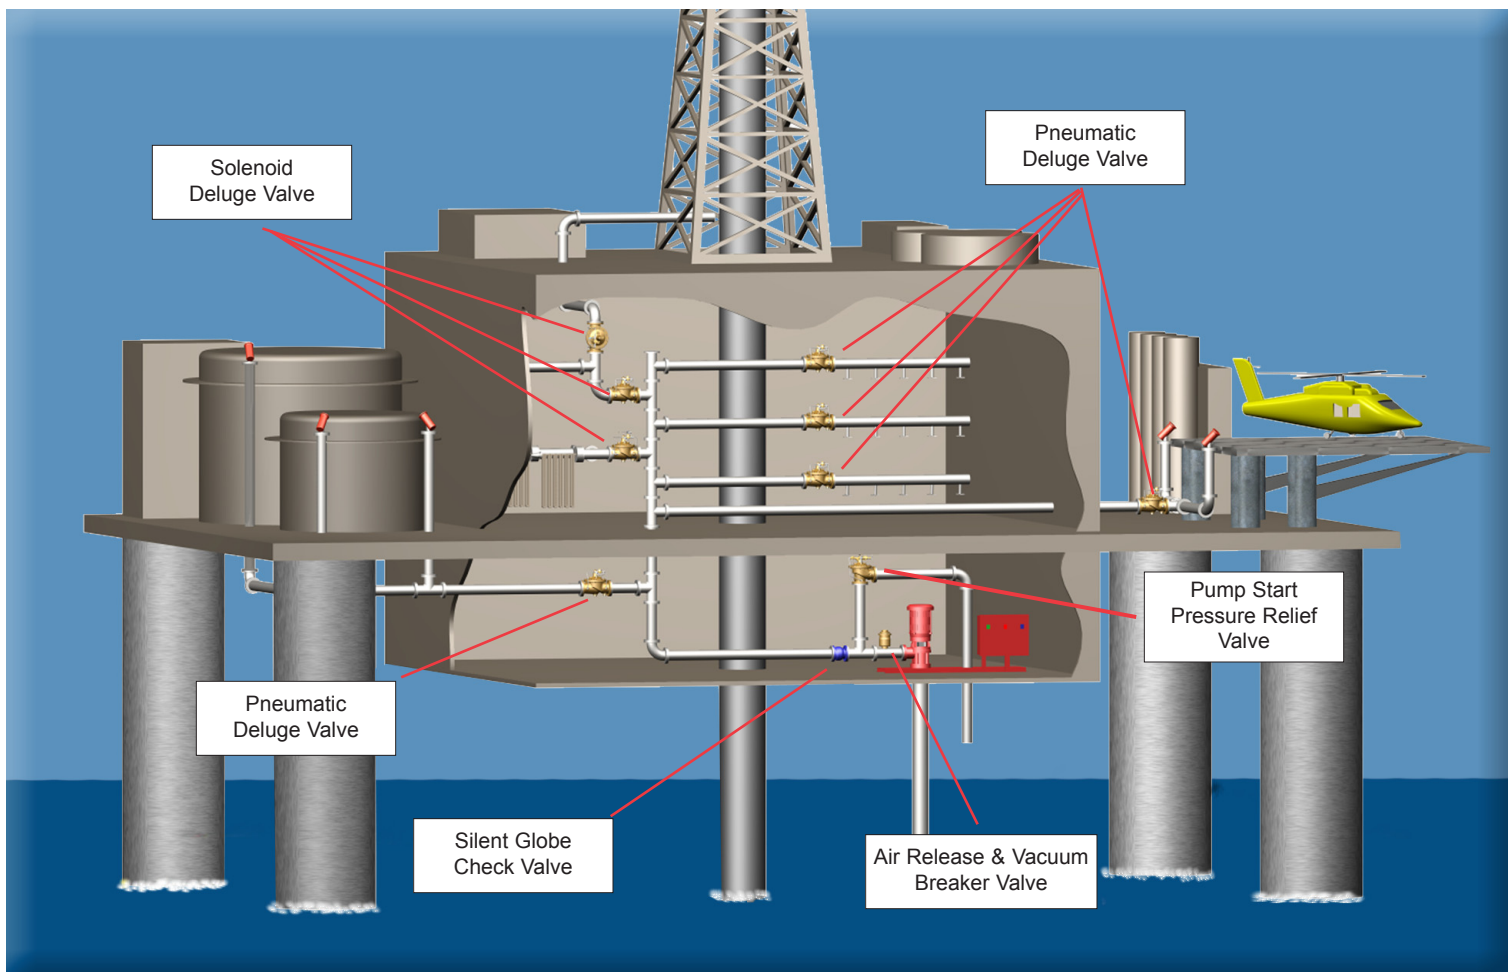

## ***Cla-Val products can protect offshore oil platforms and FPSOs in a myriad of ways***

- Protection against system damage caused by vibration using valves equipped with our patented KO Anti-Cavitation trim
- Valves specifically designed for offshore platform fire protection systems
- Pump start pressure relief
- Surge anticipation and control
- Discharge to atmosphere protection

## ***Other advantages include the following:***

- Special alloys and metals available, including Monel, and Nickel Aluminum Bronze
- Existing Cla-Val control valves can field retrofitted with KO Anti-Cavitation trim
- Proven track record of trouble-free performance aboard offshore facilities around the world
- Backed by more than seventy years of industry experience
- Three-year warranty

## Typical Cla-Val Applications on Offshore Platforms
