

UL of Canada Listed Fire Protection System Control Valves

Cla-Val Automatic Control Valves are the most trusted control valves in the fire protection industry, performing with precision and reliability at refineries and offshore oil platforms; aboard floating production, storage and offloading vessels; and in high rise buildings and industrial facilities around the world.

The products shown below have met the requirements of Underwriters Laboratories of Canada (ULC) for products used in fire protection applications in the following categories:

- Special System Water Control Valves, Class I
- Special System Water Control Valves, Class II
- Fire Pump Relief Valves

ULC Category	Cla-Val Model Numbers	Listed Sizes	Pressure Class	UL File Number/ Origination Date
Special Systems Water Control Valves, Class I (Deluge Valves)	100G 2100G	3, 4, 6, 8 and 10-inch	150 and 300	EX15267 05/08/1989
Special Systems Water Control Valves, Class II (Pressure Reducing Valves)	90G-21 90-A-21	1-1/2, 2, 2-1/2, 3, 4, 6, 8 and 10-inch	150 and 300	EX15268 09/20/1978
Fire Pump Relief Valves	50B-4KG 50B-4KG1 2050B-4KG 2050B-4KG1	1-1/2, 2, 2-1/2, 3, 4, 6, 8 and 10-inch	150 and 300	EX6688 08/10/1977
Fire Pump Relief Valves	100-01HKG	2, 2-1/2, 3 and 4-inch	150 and 250	EX6688 07/18/1988
