

# Innovations in Aviation Fueling from the leader in Ground Fueling

## Introducing the D-3 Swivel Inlet for the Cla-Val 341GF Nozzle

The new Cla-Val D-3 Swivel Inlet is the perfect alternative for nozzles that are utilized for refueling at both fuselage and under-wing locations.

The dual swivel action of the D-3 Swivel Inlet allows it to convert from a 45° elbow to a straight-through inlet. A nozzle with the new D-3 Swivel Inlet can refuel any aircraft, regardless of the location of the SPR refueling connection. Simply swivel it from straight to elbow and back again to meet your individual requirements. The D-3 Swivel Inlet bolts directly to the inlet flange of Cla-Val Model 341GF Nozzle.

The Cla-Val D-3 Swivel Inlet utilizes the proven swivel design in a novel, dual swivel configuration. When in the straight position, it provides a fully axial flow path to maximize flow and minimize pressure drop.
