

— MODEL — **94-58**

Combination Pressure Reducing & Surge Control Valve with Solenoid Override

- **Accurate Pressure Control**
- **Wide Adjustment Ranges**
- **Non-Flowing Pilot System**
- **Quick Acting Solenoid Shut-Off**
- **Easy Installation and Maintenance**

The Cla-Val Model 94-58 Combination Pressure Reducing & Surge Control Valve with Solenoid Override consists of a Cla-Val Hytrol main valve, a reducing control and a solenoid control connected to the main valve. The solenoid override is used to close the valve and downstream pressure relief pilot.

This valve automatically reduces higher inlet pressure to a steady lower downstream pressure, regardless of changing flow rate and/or varying inlet pressure.

The 94-58 is an accurate, pilot-operated regulator capable of holding downstream pressure to a pre-determined delivery pressure. When downstream pressure exceeds the pressure setting of the control pilot, the pilot valve and main valve close drip-tight. A solenoid control is provided to intercept the operation of the pressure reducing control and close the main valve. This valve is furnished either normally open (de-energized to open), or normally closed (energized to open). Pressure setting adjustment is made with a single adjusting screw.

Should the downstream pressure suddenly increase above the setting of the pressure reducing control due to on/off operation of the downstream system, the Surge Control tracks rapidly enough to prevent high pressure surges from entering the downstream system, when the downstream system is rapidly closed off. The typical combination pressure reducing and surge control valve station uses Model 94-58 to control surges in downstream piping as remote control valves change from one downstream zone to another.

Schematic Diagram

Item	Description
1	100-01 Hytrol Main Valve
2	CK2 Isolation Valve
3	CRDS-1 Pressure Reducing Control
4	X101C Valve Position Indicator
5	CS2 Solenoid Control
6	55B-60

Optional Features

Item	Description
A	X46A Flow Clean Strainer
B	CK2 Isolation Valve
H	Drain to Atmosphere
P	X141 Pressure Gauge Assembly
S	CV Speed Control (Opening)
Y	X43 "Y" Strainer

Typical Applications

Electronic Control Service

A typical application for this valve is to reduce high transmission line pressures to lower distribution system levels, while opening and closing on command. The solenoid control feature can be activated by an electrical signal from a timer or programmer.

Pressure Ratings (Recommended Maximum Pressure - psi)

Valve Body & Cover		Pressure Class				
		Flanged			Grooved	Threaded
Grade	Material	ANSI Standards*	150 Class	300 Class	300 Class	End‡ Details
ASTM A536	Ductile Iron	B16.42	250	400	400	400

Pilot System Specifications

Adjustment Ranges

- 2 to 30 psi
- 15 to 75 psi
- 20 to 105 psi
- 30 to 300 psi*

*Supplied unless otherwise specified
Other ranges available, please consult factory.

Electrical Ratings

- 24, 48, 120, 240, 480 – 60 Hz VAC
- 6, 12, 24, 120, 240 VDC

This valve is furnished either normally open (de-energized to open), or normally closed (energized to open).

Temperature Range

Water: to 180°F

Materials

Standard Pilot System Materials
Pilot Control: Low Lead Bronze
Trim: Stainless Steel Type 303
Rubber: Buna-N® Synthetic Rubber

Optional Pilot System Materials

Pilot Systems are available with optional Aluminum, Stainless Steel, Monel or Cast Steel materials.

Note: Available with remote sensing control.

When Ordering, Please Specify

1. Catalog No. 94-58
2. Valve Size
3. Pattern - Globe or Angle
4. Pressure Class
5. Threaded or Flanged
6. Trim Material
7. Adjustment Range
8. Desired Options
9. Energized or De-Energized to Open
10. Electrical Selection
11. When Vertically Installed
