

1 CV-Log-35 Firmware Update procedure

1. Connect to CV-Log-35 via WIFI Interface to access the configuration screen.
2. Click on  to enter to the advanced mode.
3. Click on the  "System" menu.

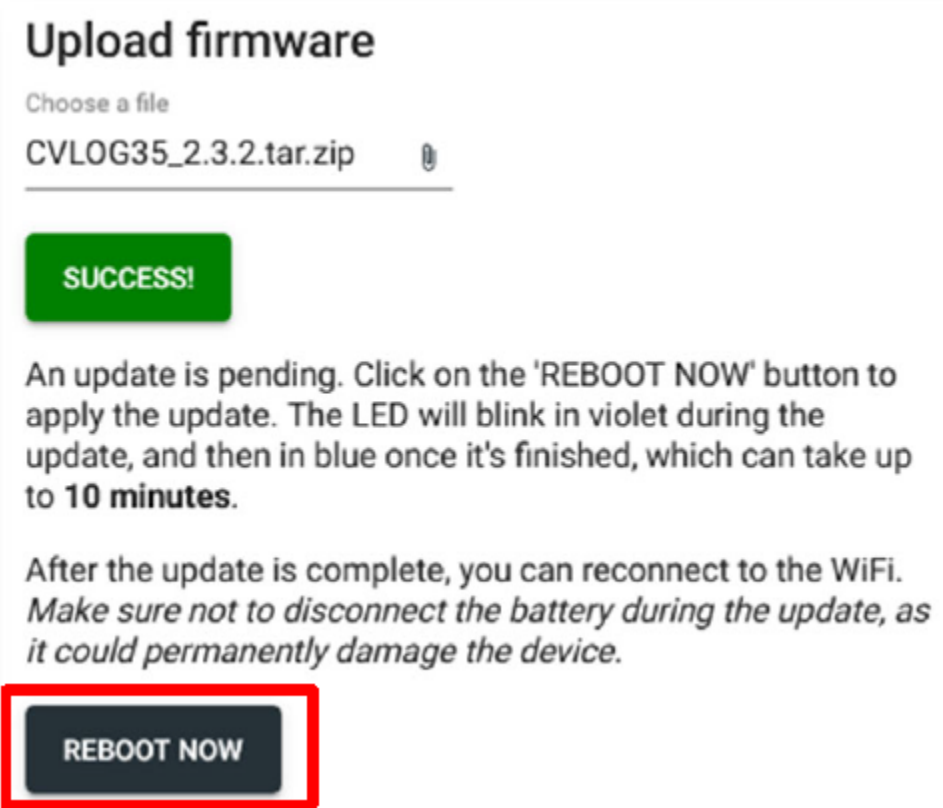

4. Click on the "**Upload firmware - Choose a file**" submenu, then choose the ZIP file for example "CVLOG35_2.3.2.tar" or latest available firmware.

5. Click on the "**UPLOAD FIRMWARE**" button and wait for a minute.

6. When firmware loading is ok. Click on the “**REBOOT NOW**” button and wait a few minutes.  During the update, The LED will blink purple. **Do not disconnect the power during this time.**

Upload firmware

Choose a file

CVLOG35_2.3.2.tar.zip

SUCCESS!

An update is pending. Click on the 'REBOOT NOW' button to apply the update. The LED will blink in violet during the update, and then in blue once it's finished, which can take up to **10 minutes**.

After the update is complete, you can reconnect to the WiFi. *Make sure not to disconnect the battery during the update, as it could permanently damage the device.*

REBOOT NOW

7. When the update is completed, The CV-Log-35 will return in “**Configuration**” Mode and the LED will blink blue.

 After some minutes of inactivity, the CV-Log-35 will exit from the “**Configuration**” mode and enter “**Acquisition**” Mode.
